PRESS RELEASE

TZMI's Introduction to the titanium and zircon value chains

10 February 2014 – TZ Minerals International (TZMI) is pleased to announce the release of *Introduction to the titanium and zircon value chains*.

TZMI's *Introduction to the titanium and zircon value chains* is available as a complimentary publication and provides an easy-to-read guide to the titanium and zircon value chains.

This 38-page publication discusses the mineral sands industry and the importance of titanium and zircon minerals to the sector. It includes detail about what is involved in extracting and processing the minerals prior to shipping and outlines the various multi-billion dollar value chains in which the minerals are used.

There is a brief history of mineral sands and the development of TiO₂ pigment processes, plus an explanation of the link between economic growth and demand for titanium and zircon minerals.

It is an invaluable educational resource for both newcomers to the sector and those with more experience.

For more in-depth knowledge on titanium and zircon and their respective markets, TZMI has a wide range of publications, which you can view by visiting www.tzmi.com

About TZMI

TZMI is an independent consulting company, operating since 1994, that works with a wide range of global clients to provide insight and expert advice on opaque mineral, metal and chemical sectors.

TZMI is unique in that it has technical and operational experience, together with strategic and commercial competency, to provide a full service offering to clients.

As trusted advisors, TZMI's reputation is underpinned by having an experienced cross-section of technical specialists around the globe.

TZMI partners with clients from the private and public sectors to provide bespoke solutions across markets and strategic services as well as specialised technical and engineering services. Clients range from the world's 500 largest companies through to mid-sized companies and small businesses.

TZMI regularly releases market reports and periodicals on relevant subject matters which support its primary consulting activities with up-to-date, high-quality and comprehensive data, analysis and information.
